ENGLISH IN THE MODERN WORLD.

English is a global language, widely spoken and understood across borders, making it a valuable tool for international communication. Proficiency in English opens doors to various academic and professional opportunities, as many educational institutions and workplaces use English as a medium of instruction and communication. It also facilitates access to a vast wealth of information and resources on the internet, enriching their knowledge and expanding their horizons. Moreover, English is often considered the language of business, science, and technology, making it essential for career advancement.
